| <input type="checkbox"/> Small portable cold laminator | <input type="checkbox"/> Smartboard |
| <input type="checkbox"/> Digital camera | <input type="checkbox"/> Zip 250 USB Powered |

In order to help us with future funding so we can buy more equipment, please give a brief description of how you plan on using this technology. Feel free to share your own thoughts and/or check any and all that apply:

Will you be doing:

a lesson plan using interactive technology to engage learners

Internet searching and website evaluation

Other: _____

Please describe how using this technology will improve your students' learning:

Students will be encouraged to become active learners through the use of structured research activities and group project work

Students will become engaged learners and be encouraged to take responsibility for their own learning and research

Students will be expected to share what they've learned and teach it to others

The technology will assist the student with problem solving, and create a collaborative learning environment

_____ Students will learn powerful searching skills to effectively and easily locate desired information, to assess it's appropriateness for particular purposes

Other: _____

By using technology in my classroom I am hoping to provide:

_____ Improved student attention & on-task times

_____ Increased classroom interaction & participation

_____ Technology to empower the delivery of differentiated instruction in my classroom

_____ Learning tasks that are authentic, challenging, and multidisciplinary

_____ Instructional models that are interactive

_____ Improved motivation, attitude, and interest by maximizing students' experience of success

Other: _____

Thank you for taking the time to complete this form.
